

HERE GOES.

FOUNDER PRE-HACKATHON PACKAGE

Everything you need before the Selection Hackathon.

17-18 September

Selection Hackathon, Berlin

Confidential and property of Creative Dock

HERE GOES PROGRAM

The industry's next move. Defined by you.

HERE GOES is a founder-first venture studio partnering Bosch's industrial edge with Creative Dock's venture-building expertise. Together we build a continuous pipeline of independent companies, led by exceptional founders, built for external customers and follow-on capital. Success is defined by validated customer demand, first revenue, follow-on investment potential, and the ambition to become a category leader.

**€250K PRE-SEED
AFTER IC SELECTION****MAJORITY FOUNDER

DESIGN PARTNER****BUILT FOR
FOLLOW-ON CAPITAL**

Your journey — program duration: 6 months

WE ARE HERE

01**HERE I GO.**

Apply. Show what you've built, led or learned.

02**HERE WE GO.**

Selection Hackathon. Real manufacturing challenge — meet your co-founders.

03**HERE WE GROOVE.**

3 months. Form the team, validate, €1,200/mo per founder.

04**HERE WE PROVE.**

Investment Committee. Present team, evidence, feasibility, growth.

05**HERE IT GOES.**

€250K pre-seed. Independent company, 80% founder-owned.

06**HERE IT GROWS.**

Customers & capital. Traction, follow-on rounds, global category.

From application to independent company

SELECT — Apply and show what you have built, led and learned; the Selection Hackathon puts you to work on a real challenge.

FORM — Three months in Prague or Berlin to form the team and test the opportunity.

FUND — Present team and evidence to the Investment Committee for €250K pre-seed.

LAUNCH — Build the company: win customers and prepare for scale.

GETTING READY

Pre-Hackathon steps

Steps between today and Berlin.

1

Read this pre-hackathon package

Go through this document, detailing the program and expectations from the Hackathon.

2

Sign the NDA

Sign the NDA to receive the complete Founder Package in the next days.

3

Book your travel to Berlin

Arrange your own travel and confirm you can be in Berlin for both hackathon days, **17-18 September**. See below what is covered and not covered by Creative Dock.

4

Receive your complete Founder Package

You will be matched with these venture concepts for the hackathon, according to your preference.

5

Join the Kick-off Call on 15th September

Connect on the morning of **15 September** for the online kick-off and a walkthrough of the venture concepts.

6

Join the Q&A Call on 16th September

A dedicated live session to ask any remaining questions before the Hackathon begins.

7

Be in Berlin on 17-18 September

In-person attendance for both hackathon days.

Address: The Hackathon will take place at the following address: Kieffholzstraße 3, 12435 Berlin-Bezirk Treptow-Köpenick.

There is no legal entitlement to participate in the Hackathon, and the organizer reserves the right to decide who is eligible to participate in the Hackathon.

LOGISTICS

What is and is not covered by Creative Dock

✓ Covered by Creative Dock

- Refreshments throughout the Hackathon
- Lunch on 17 September
- Dinner on 17 September
- Lunch on 18 September

✗ Not covered

- Travel to and from Berlin
- Accommodation in Berlin
- Travel insurance
- Laptop and software for work during the hackathon

THE HACKATHON

Hackathon objective

Only the qualified teams proceed to Phase 1 of the Accelerator program.

01**A real starting point**

A researched concept package is given to each founder, so that every participant has a real concept as a starting point.

02**Show real founder thinking, not "just" a pitch**

Technical depth and a monetization strategy are key.

03**Seed the case for investors**

The output from the Hackathon is a scaled-down version of the same venture case that goes in front of the IC in three months.

Agenda

DAY 1 · SEP 17

- 09:00** Arrival, instructions & ways of working
- 10:00** Start of Hackathon
- 12:00** Lunch
- 13:00** Continue Hackathon
- 17:00** Day 1 closing & social event after-hackathon

DAY 2 · SEP 18

- 09:00** Start of Hackathon day 2
- 12:00** Lunch
- 13:00** Presentations
- 17:00** Day 2 closing & next steps

What founders must bring to the table

Technical craft

Ability to reason from data to product and to produce a tangible solution: a code, a synthetic dataset, a model logic walkthrough.

Commercial judgement

A monetization hypothesis with real numbers attached, showing pricing logic and venture scalability, even if the customer conversation hasn't happened yet.

Relevant experience

Prior experience, domain credibility and network that the founder can leverage to build a standalone venture, without depending on Bosch assets.

Hands-on approach

Creativity and speed over polish. The bar is a believable early prototype, showing that concept validation can be achieved within 3 months.

HACKATHON OUTCOME

What is expected from the hackathon and what is expected in three months

	Expected from Hackathon (September)	Expected from Phase 1 (Delivered for IC December)
Problem & Solution	A reasoned hypothesis, backed by desk research and data that supports the problem statement and proposed solution.	→ Validated pain point & external validation for proposed solution (industry and customer conversations)
Business Model	A monetization hypothesis and initial business model proposal, including pricing logic, revenue streams and target customer groups.	→ Modeled unit economics, with validated pricing / willingness-to-pay, margin and forecasted revenue streams.
Bosch right-to-win	How the founding team would use potential Bosch assets if access were to be granted.	→ Contact established with Bosch stakeholders; potential collaboration and monetization strategy assessed with plants, asset or IP owners.
Commercial validation	Initial Go-to-Market Strategy and commercial plan for Phase 1, with concrete steps of how external validation will be achieved in 3 months.	→ A qualification funnel with a live pipeline, real conversion data, and potential leads for the first LoIs to be signed.
Technical validation	Show how product / solution works, for example, with model logic, demo, preliminary prototype. Show how it will be achieved in 3 months.	→ A live prototype, hardware / software demo that has been tested and is technically feasible.
Team & Ask	The founder's edge, named team gaps, and the kind of co-founder / team members that they're looking for.	→ Initial team planning and required budget / what the €250K will fund.

Not expected from Hackathon - yet

× Bosch network access

No introductions into internal Bosch teams or systems before or during the hackathon.

× External customer validation

No live customer interviews are required in the 48 hours of the hackathon. The concept package contains all relevant information.

× Legal or technical feasibility studies

Flag the open legal or technical questions; you don't need to resolve them during the hackathon.

× A finished monetization model

An initial business model and pricing hypothesis is enough. Validated pricing and a modeled P&L are not required at this stage.

RULE OF THUMB: Plan the venture so it works without Bosch. Then show where Bosch would bring an unfair advantage. Not the reverse.
